PROJECTS

WCE Classroom :

- This is an web application documented in Django. As we know teacher find it very difficult to collect assignment from students, assess them, mark these assignments and share marksheet with students.
- By using this application it is very easy for teachers to do above task. Also students are able to keep all the study material and video at one place.
- This application is deployed on replit for ease access for everyone.

Lab Management System : Java MYSQL

- As we know in day to day normal life, we need to keep manual data of lab check in and check out
- Instead of writing PRN, Dept, times,etc. and handling the books to check this all record we can make a system which is accessed by all students on their PC.
- They can enter the LAB data as well as to manage attendance we can check the dates and respective students.
- This project can be installed on single or multiple PCs.
